

**KOCAELI UNIVERSITY FACULTY OF MEDICINE
MOLECULAR RESEARCH AND ANTIBODY LABORATORY
(MOLARANT LAB)**

MOLARANT LAB is a thematic (Microbiology, Immunology, Molecular Biology) laboratory established in 2015 within the Department of Medical Microbiology with the projects of Eastern Marmara Development Agency, Tübitak, and KOÜ BAP. The laboratory is still managed by the laboratory supervisor and faculty members who are the coordinators responsible for the projects that form the basis for the establishment of the laboratory. At the same time, researchers who have received financial support from national and international scientific programs and post-doctoral researchers are working in this laboratory. Academic personel or researchers working in the laboratory must have scientific equipment and working skills compatible with the laboratory concept (molecular research, antigen-antibody production and characterization).

Staff member of the laboratory:

Laboratory supervisor:

Prof. Dr. Aynur Karadenizli

Laboratory team:

Asst. Prof. Hüseyin Uzuner

Asst. Prof. Candan Yılmaz

Post-doctoral researcher Arzuhan Büyüker
